IMPORTANT PLEASE READ THIS MANUAL FULLY PRIOR TO ASSEMBLY AND USE

For your safety & to ensure a long & trouble free life of your bicycle check the operation of brakes, lights, tyre pressures, horn & gears also check all fasteners including quick release mechanisms before every ride

Maximum permissible load including rider is 100Kg

Service & Spares

Cables may stretch a little during the first few uses. Brakes and gears may need to be adjusted after the first few rides to ensure correct operation. If you return the bicycle to us (please contact us first) we will be pleased to check & adjust accordingly within the first 6 weeks of purchase free of charge, if it is more convenient for you a local cycle shop could carry out this operation at your expense.

Your **BATRIBIKE** bicycle uses standard cycle parts wherever possible. Items such as tyres, tubes, lights, brake pads/blocks and cables may be obtained direct from us or your local cycle shop or retailer.

Specialist parts such as the motor, battery, & electrical parts or frame components are only available from Fallowgate Limited

PACKAGE CONTENTS

- 1 ASSEMBLED BICYCLE
 - 1 BATTERY
 - 1 BATTERY CHARGER
 - 1 MANUAL
-

- 1 Fold pedals by squeezing in as per photo and turning through 90 degrees.

- 2 Put up the side stand.

- 3 Release the handlebar folding quick release mechanism as follows:-

Lift Lever

Fold Lever
Down

Press Button
to Release

Fold
Handlebars

- 4 Release frame folding quick release mechanism as follows:-

Lift Lever

Turn Out
90 degrees

Lift to Release Pin
from Locating Hole
in Frame

- 5 Fold frame in half front to back

- 6 To return to riding position reverse procedure

Riding

- 1 Make sure the red button is in the power off position
Turn on the battery with the key
- 2 Make sure to put up the side stand before mounting the cycle

With the red button in the off position you can ride the breeze as a normal cycle.

OFF

With the red button in the on position the power will cut in as you pedal and the throttle will also work. When using throttle alone the speed is regulated by rotating the throttle. Full power is achieved by twisting the throttle towards you.

ON

- 3 To stop, release the throttle and pull brake levers towards you.
- 4 When the battery is turned on the front light monitors the light level & comes on automatically as required.
- 5 The rear light requires two AA batteries.

IMPORTANT

Before dismounting make sure the red button is in the off position.

OFF

Tyre Pressure

The tyres should be pumped up to within the range stated on the sidewall. This should be regularly checked as running with the correct pressures will ensure maximum range from the battery.

Battery Charging

The battery can be charged either on or off the bicycle but must be charged inside in dry conditions to avoid the risk of electrical shock.

Only use the charger supplied with the bicycle.

- 1) Slide the charger socket cover on the battery to one side.
- 2) Ensure the power is turned off on the battery.
- 3) Insert charger lead into socket on battery casing taking care to get the plug in the correct position as the pins are off set.
- 4) Insert 3 pin mains plug into mains socket and switch on at wall.
- 5) There is an indicator light on the charger

CHARGE—Glows red when charging and green when charge complete.

- 6) When battery is charged firstly turn off the mains supply, unplug and then remove the charging plug from the battery.

To ensure maximum battery life charge your battery after each ride & **DO NOT** leave fully discharged.

If your BATRIBIKE Breeze is not in use for an extended period, charge the battery once a month to prevent deterioration

Quick release fittings for seat & handle bar height adjustment

With the locking lever in the loose position, tighten the nut until finger tight.

The final tightening is done by moving the lever to the locked position. To undo move lever to loose position to enable height adjustment.
